

Discover Leaking Toilets

Detect leaking toilets and avoid unexpected, large water utility bills – taking care of **water reserves** at the same time

The Aguardio Leak Sensor is installed literally in minutes as a **clamp-on** solution, fixed with strips to the toilet water inlet

The Aguardio Leak Sensor is capable of detecting toilets that leak more than **5 litres** of water an hour

Aguardio Leak Sensor is able to **sound** a notification when it detects a leaking toilet

Push button to **deactivate** sound for 24 hours

10 year expected battery life time

How big is the challenge?

A: Water trickles down the inner backside of the toilet pan, but the water surface in the toilet remains calm – using around **274 liters daily, 100 m3 yearly**

B: Water trickles down and the water surface in the toilet ripples slightly – using around **548 liters daily, 200 m3 yearly**

C: Water leaks down inside the toilet and visibly disturbs the water surface – using around **1096 liters daily, 400 m3 yearly**
