For an intelligent
use of energy

enerbrain

50 experts 1 common goal:

"We founded Enerbrain because we are convinced that the cities of the future must be sustainable, smart, and people-oriented.."

Giuseppe Giordano CEO

Clients

Awards

Best European Scaleup European Institute of technology

Gartner Cool Vendor 2017
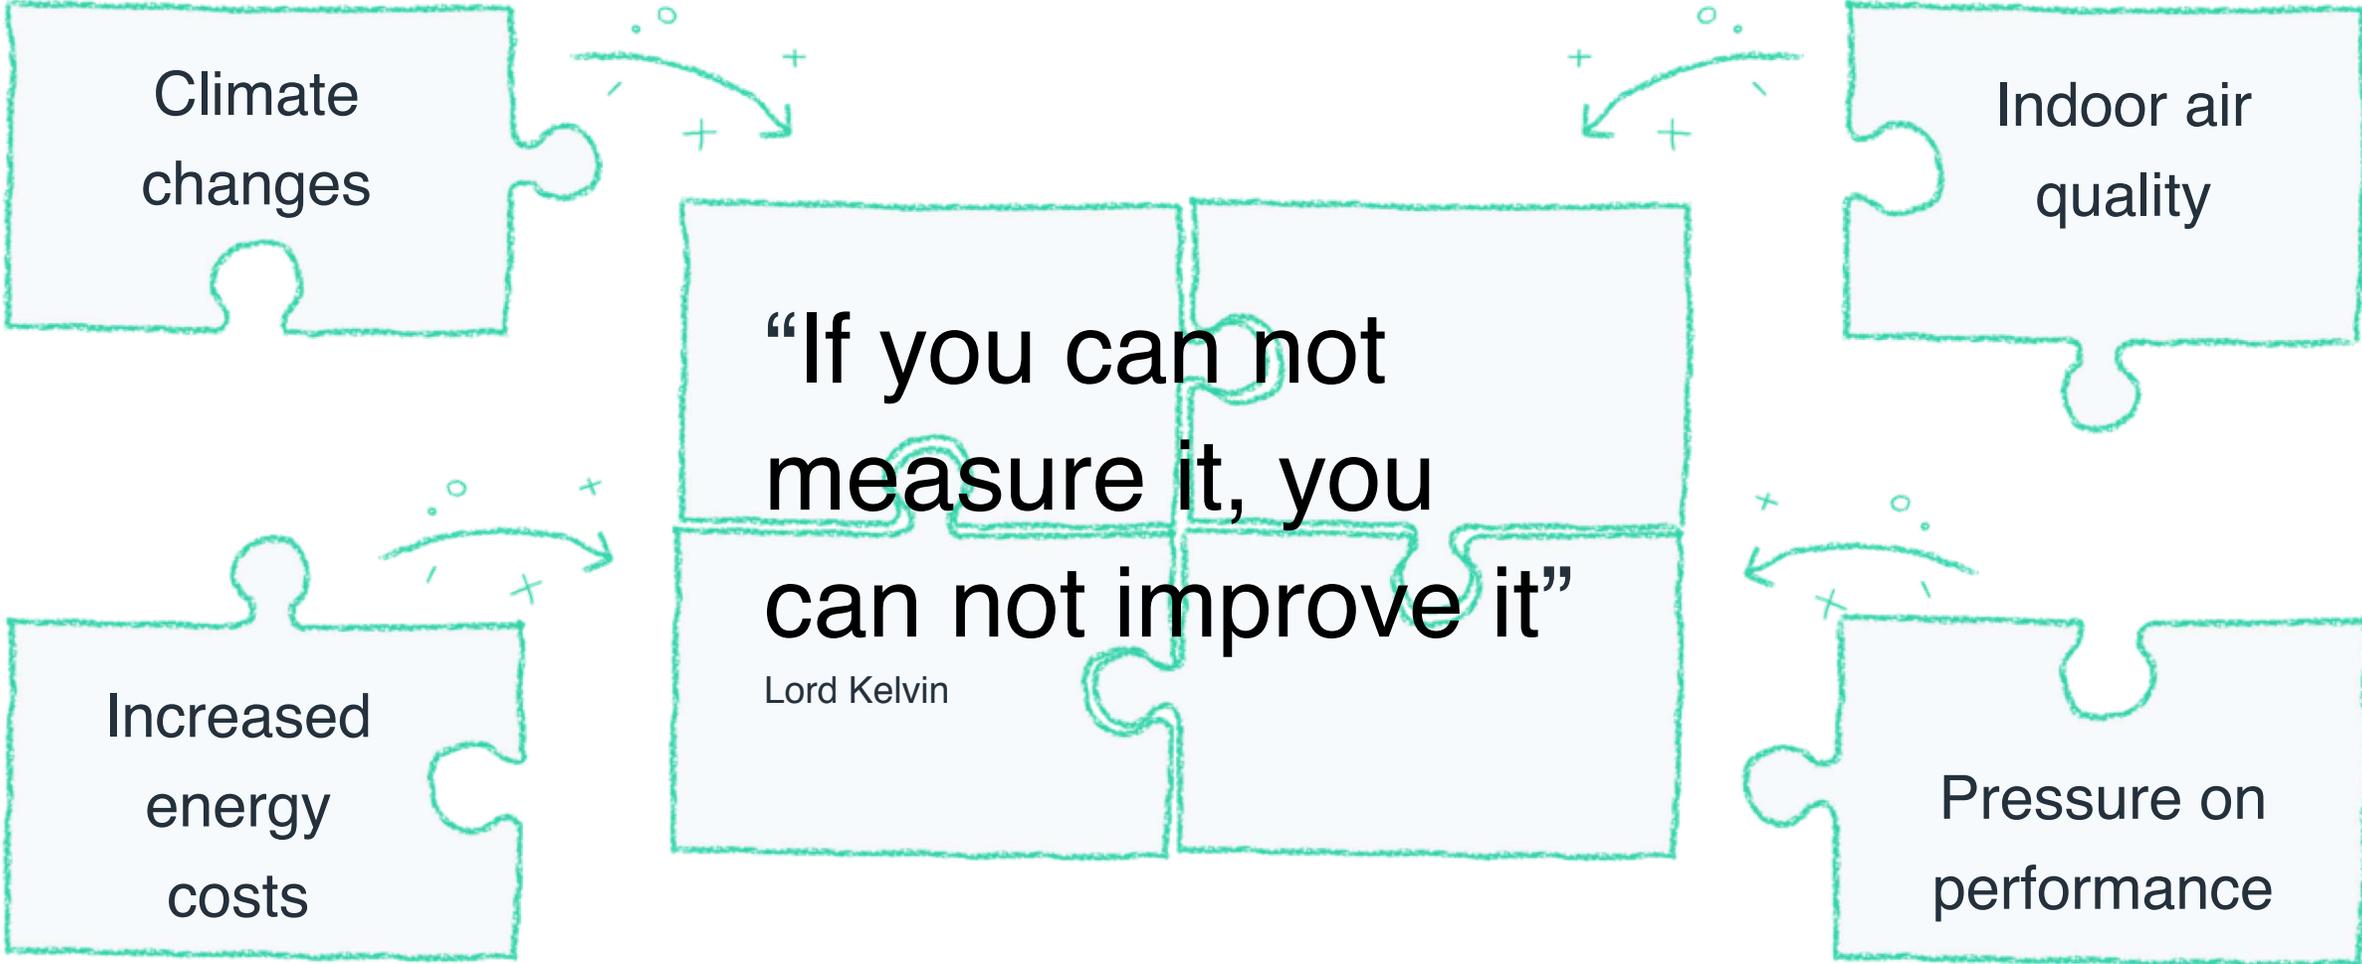

Part of the Microsoft AI for Earth green program

Awarded by the European Commission with a Seal of Excellence

Why Enerbrain?

Climate changes

Indoor air quality

Increased energy costs

Pressure on performance

"If you can not measure it, you can not improve it"

Lord Kelvin

enerbrain®

How to work together: 3 possibilities

With full monitoring of all energy flows, Enerbrain can provide detailed real-time analysis and benchmarking with enterprise KPIs.
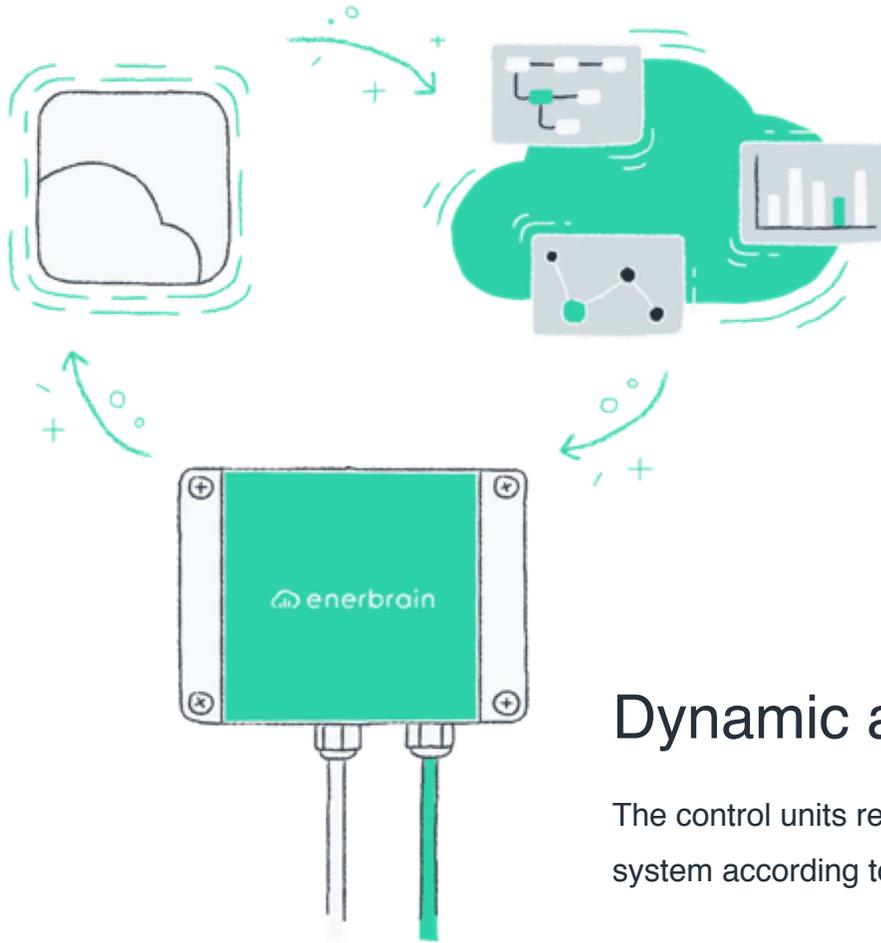

The intelligent solution Enerbrain, allows you to get to the full efficiency of the plants (whether they are new generation or older).

Thanks to our experts and innovative dashboard (easy and intuitive), Enerbrain can provide consultancy to improve the efficiency of buildings and production sites.

enerbrain®

The "easy to play" solution for energy

Tailor-made monitoring

A monitoring system tailored to your needs sends the data to our cloud (wireless and batteries for environmental sensors, ad hoc network infrastructure for energy flows).

Artificial intelligence

The cloud receives the data and uses machine learning algorithms that process the best parameters of comfort and efficiency to be sent to the control units. The same algorithms process and analyze the production KPIs.

Intuitive dashboard

It is possible to manage the entire real estate portfolio in real time remotely thanks to the dashboard, designed for an optimal user experience.

Dynamic automation

The control units regulate the existing system according to the customer's needs.

enerbrain

What can we achieve?

Reduction of CO_2 emissions	Comfort and air quality within buildings	Reduction of operating costs

Sustainability

-100 T CO$_2$

Emissions

(6.000 sqm retailer)

Comfort

> 90 %

Time in comfort

(± 2°C setpoint)

Efficiency

> 20 %

Energy saving

enerbrain®

Enerbrain competitive advantages

Easy & Fast

Through an expert team Enerbrain system is installed in few days. The system is fail-proof and integrates with any existing brand or industrial system, improving performance and extending its lifetime.

Turnkey

Enerbrain takes case of every step: design, manufacturing, consulting, installation, customer training, comfort, savings measurements and sustainability engagement.

Worldwide Standards

Enerbrain products are all designed and manufactured in Italy and comply with CE and many international certifications.
All data and services comply with privacy standards.

enerbrain®

It all can start with a
test
