

UP400

NEXT GENERATION PORTABLE GENERATOR.

KEY VALUES

UP400 is the most innovative generator in the world. The unit can be connected with solar panels or wind turbines to create a miniature “smart-grid” and go energy independent.

Our features:

- Water and corrosion resistant
- Shockproof, silent and smell-free
- Lightweight and compact
- Minimal maintenance
- Zero-emission

THE FUTURE OF ENERGY GENERATION

This 400 W generator is designed to fit your needs and to offer you ultimate convenience. Easy to use with a smart and compact design, the UP400 brings you energy independence. Wherever you are, this unit will allow you to charge your laptop, smartphone, radios, lights, fans and other devices. Perfect as a standalone unit or combined with batteries, solar panels or wind turbine.

RE-FILL IN MINUTES

Our ultralight type 4 cylinders are equipped with quick connects that make refilling and cylinder exchanging easy and fast. Cylinders come in sizes of 2-9 liters (in water volume) and will neatly fit in any compartment. The 9 L cylinder weighs only 4,8 kg and at full power consumption would last nearly 9 hours. Our 105 L cylinder will last 10 days at full power consumption and can be refilled at any hydrogen refilling station that operates at 700 bars.

Output voltage	12 V
Max continuous charging current at 12 V	32 A
Max continuous power output	400 W
Max charging power per day	800 A h
Fuel	Compressed hydrogen (>99,97%)
Fuel consumption at 400 W	5,2 L/min
Size (L x W x H)	52 x 15 x 25 cm
Weight	10 kg
Operating temperature	-20 °C to 50 °C
