NEW PRODUCT

recycle leather scraps
from industrial glove factories.

These off-cuts were
destinated for destruction.

**COATED
RECYCLED
LEATHER**

A SUSTAINABLE CIRCLE TO GENUINE LEATHER

12  **RECYCLEATHER**

Reuses leather scraps and off-cuts destined for landfills from a Chinese glove factory. They mix the off-cuts with a natural latex to make luxury leather.

**Natural Recycled Material
(Fibers + Latex)**

**20 Tons Wastage Saved
(Going to Landfill)**

SUSTAINABLE DEVELOPMENT GOALS

**50% Use Less Water
(from Traditional Tannery)**

**Zero Manufacturing Waste
(Recycle our factory's off-cuts)**

**Recyc Leather is proud to be qualified to the
United Nations Sustainable Development, Goal #12,
Responsible Consumption & Production.**

Our material is produced from leather scraps, collected from factories of garden gloves, in southern China.

Too small to be reused, these scraps were intended to be buried for landfill.

Recyc Leather has found a way to enhance off-cuts by giving them a second life

As soft as traditional leather, it suits perfectly for leather goods

The best of high-tech, Iné,
combined with *Recyc leather*
to make a more sustainable
power-wallet.
