

Beautiful, Affordable and Sustainable Office Furniture

Rype Office is a Circular Economy office furniture company which saves clients money, creates community value and addresses the 300 tonnes of office furniture going to landfill every working day in the UK. We do this by:

- **Remanufacturing**¹ high quality unwanted furniture (from clients or the used furniture market) to as-new condition using quality-controlled engineering processes.
- Accessing manufacturers' **surplus stock**
- Creating **sustainable new furniture** made by social enterprises including the Merthyr Tydfil Institute for the Blind

Our free award-winning design service integrates all furniture and reclaimed/surplus flooring into beautiful, productive and healthy offices.

*RePlastic table by Rype Office
(top made of waste kitchen cutting boards and discarded black plastic bags, legs remanufactured Vitra)*

Our projects support local communities by using local suppliers and local trades including upholsterers, polishers, powder coaters and carpenters and we engage local long term unemployed with disabilities – to whom we pay Living Wages.

Our 90+ projects to date, for universities, government departments, businesses and charities, have been recognised through a range of awards.

We aim to transform the industry and enjoy working with clients seeking value and a more sustainable future.

¹ Remanufacturing takes the long-life elements of an item (like steel frames), checks and resurfaces them, and then rebuilds the piece around them.
