

JOIN OUR EXPERTS' COMMUNITY

The Solar Impulse Foundation aims to identify clean, efficient and profitable solutions in order to accelerate their implementation and the transition to a sustainable economy. Thanks to the awarding of a label with high standards of sustainability and profitability, the Foundation can support political and economic decision makers in their efforts to achieve their environmental targets and encourage them to adopt more ambitious energy regulations, necessary for the implementation at large-scale of these solutions on the market.

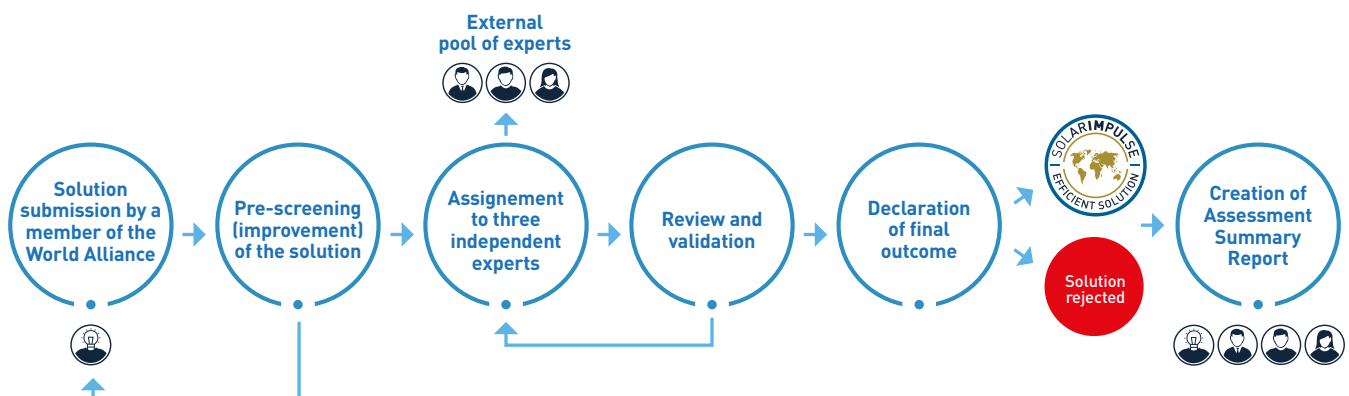

The Solar Impulse Efficient Solution Label will be attributed through a trustworthy and verified methodology based on a rigorous assessment performed by external independent Experts.

THAT'S WHERE WE NEED YOU!

OUR EVALUATION PROCESS

Each candidate Solution is assessed by three independent Experts on our three criteria: **Feasibility, Environment and Profitability.**

The result of the three independent Expert's assessments (when completed in accordance to the Assessment Guidelines) will serve as a decision on whether or not to attribute the Solar Impulse Efficient Solutions Label.

OUR EVALUATION METHODOLOGY

Assessments, or Experts' evaluations, are performed online via the **Solution Assessment Form (SAF)** which is composed of the following sections:

1. Credibility of concept
2. Scalability

3. Environmental benefits

4. Client's economic incentive
5. Seller's profitability

JOIN OUR EXPERTS PROGRAMME

Who are we looking for?

- Enthusiasm, flexibility and interest in the SDGs
- Professionals with minimum 5 years of relevant technical experience in:

How can I become a Solar Impulse foundation Expert?

1. Create your account here
2. Complete your profile, indicating your areas and years of expertise
3. Upon validation, follow our mandatory e-training
4. Start assessing Solutions!

What does the Expert role look like?

- Receive Solution's proposals tailored to your Expert's profile
- Access the Solution Submission Form (10-20 pages file)
- Accept or decline Solutions on a case-by-case basis
- Evaluate all the 5 criteria within max. 15 days
- Receive the outcome of the Solution you have assessed

What are some of the benefits?
