

1000+ efficient solutions to protect the environment in a profitable way

“ Today, thousands of solutions exist that can preserve nature while boosting economic growth, but they are often hidden in start-ups or research labs. They remain unknown to decision makers and are not implemented at industry level. By achieving our 1000 Solutions Challenge, we have now the proof that there are enough technologies to make our world more profitable, efficient and sustainable. Therefore, no excuses left for inaction as decision makers cannot pretend anymore that ecology is too expensive, hurts the economy and destroys jobs!”

Bertrand Piccard, Initiator and Chairman of the Solar Impulse Foundation

A FOUNDATION FEDERATE, PROMOTE, ACCELERATE

Bringing together clean technology players, highlighting clean and profitable solutions to ensure their implementation, initiating synergies between solution providers and investors and demonstrating the considerable impact of efficient solutions on the economy and the environment to accelerate the transition to a sustainable carbon neutral economy.

A LABEL RECONCILE ECONOMY AND ECOLOGY

Collaborating with independent experts and recognized institutions, evaluating solutions capable of protecting the environment in a profitable way thanks to a unique and free label and referencing the labelled solutions in the Solutions Explorer, a search-engine for climate action allowing the selection of solutions based on based on technical, environmental and socio-economic criteria.

A VOICE AND A TEAM ACTIVATE THE IMPLEMENTATION OF SOLUTIONS

Encouraging governments to put in place more ambitious energy policies and environmental goals. Goodwill Ambassador of the United Nations for the environment, Bertrand Piccard and his team collaborate with public authorities of regions and cities to identify their needs, bring innovative solutions and sustainably integrate these clean technologies in local territories.
